

As a natural part of our product range, we can supply all kinds of relevant pneumatic components used in conjunction with our pneumatic vibrators.

- **Pedal operated valve** for hands-free activation of the pneumatic vibrators
- **Hose couplings** For any standard pneumatic hose connection
- **Tube** made in nylon or PUR in any size for Push-In fittings
- **Fittings** for Push-In or Push-On systems in all variations and sizes
- **Throttle Valves** for the adjustment of the inlet or the outlet pressure of the pneumatic vibrators
- **Solenoid Valves** for activating the pneumatic vibrators - Electrical 24V or 230V, pneumatic and manual operation
- **Silencers** to reduce the noise level - made in plastic, sintered bronze or with throttling for adjustment of the amplitude
